

AMENDMENT TO THE SPECIFICATION

Please insert the following paragraph on page 4, after paragraph no. [0021].

FIG. 9 is a partial cross-sectional view of an embodiment of the
vented package.

Please amend the paragraph beginning on page 5, paragraph no. [0025].

Any coating may be added to the fabric 11 of the package to reduce gloss, fibrillation, slippage, or for any other technical reasons. Such coating may comprise polyolefin that is thermal bonded to woven fabric of the package construction to prevent fibrillation. A coating 13 may be provided on an inner or outer surface of the package, or alternatively on both inner and outer surfaces, as shown in Fig. 9, to enhance the suitability and fitness of the package.
